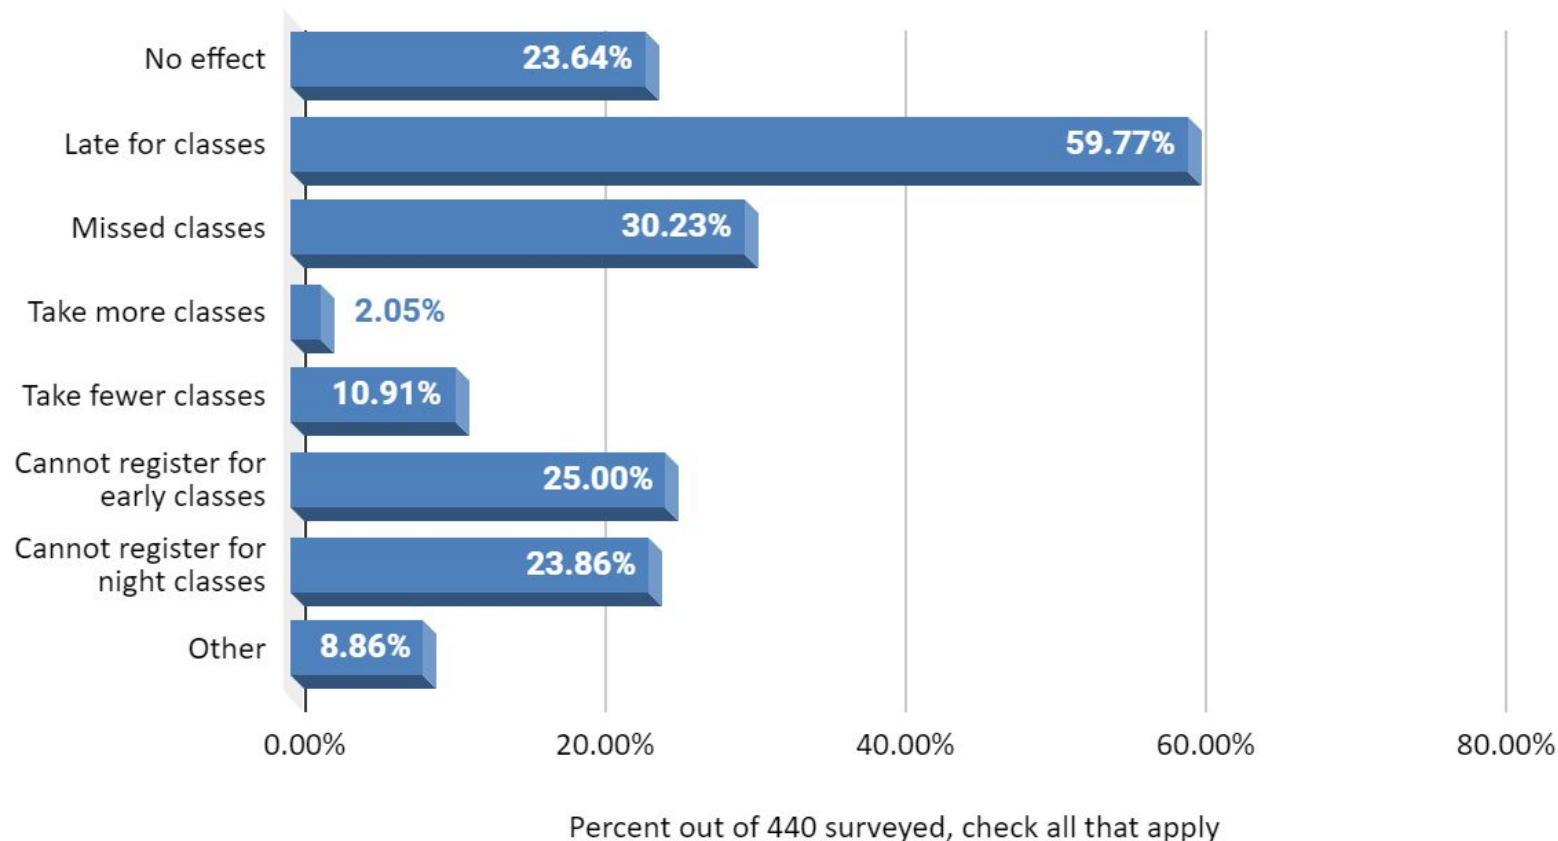

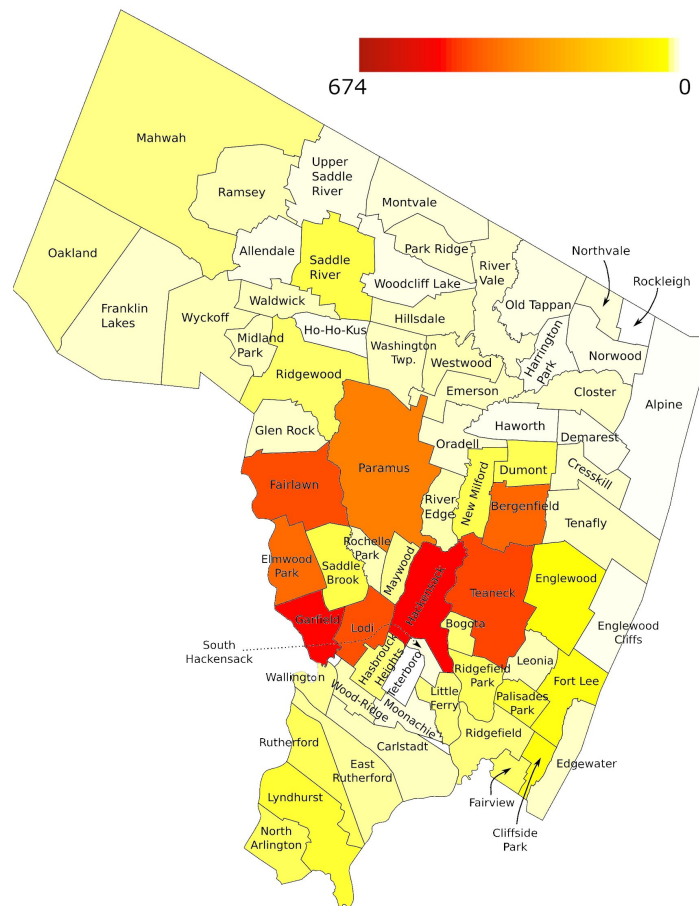

Figure 19. Student Enrollment per town

Map of New Jersey showing the number of people per square mile in 1990. The map uses a color scale from yellow (low density) to red (high density). The highest density is concentrated in the New York City metropolitan area, particularly in the counties of Essex, Hudson, and Bergen. The map is labeled with the names of various counties and cities. A legend at the top right shows the color scale from 0 to 674 people per square mile.

Legend:

- Direct bus route to campus
- No direct bus route (two or more buses)
- No public transportation available

College location

10 miles
